

## Recovery Stall Door Lock

The Shank's® Recovery Stall Door Lock is a heavy duty square tubing assembly that can be bolted or welded to an existing double door. The Door Lock provides secure deadbolt locking of a recovery stall double door set. A building structural header is required for installation of this product.

### Technical Details

- 3" x 3/16 wall (7.6cm x .48cm) square tube fabrication
- Height determined by existing door structure
- 1" (2.5cm) upper and lower stainless steel cane bolt pins with handles
- Set of three heavy duty mounting plates (either drilled for anchor installation, or can be welded to metal door structure)
- Metal bracket provided to mount to door header for upper deadbolt pin
- Mild/carbon steel fabrication with hot dip galvanized coating

### Optional Features

- Stainless steel fabrication
