

Shoring Beam

The Shank's® Shoring Beam is an aluminum tubing assembly that is designed to be connected to a double door set for deadbolt locking without the use of upper or lower deadbolt pins. The Shoring Beam can be incorporated as part of our Double Door Set, or it can be installed on any existing door set. The assembly includes mounting brackets that are designed to be affixed to each door panel, and on the adjacent walls on each side of the door panels.

Technical Details

- 3" x 1-1/2" x 1/4 wall aluminum rectangular tube Shoring Beam, made to length for door opening
- Set of four heavy duty stainless steel support brackets included (drilled for anchor installation)
- One Shoring Beam "set" includes one (1) shoring beam and four (4) support brackets

Optional Features

- A Double Door can be secured with two Shoring Beam Sets, or with one Shoring Beam Set and 2 upper deadbolt locking pins
