

Bilateral Hind Limb Support

The Shank's® Bilateral Hind Limb Support ("Support") is a Table accessory designed to be used to support the rear legs during surgery.

Technical Details

- Support can be connected to any Shank's Dorsal/Lateral Equine Table
- Support is designed to allow for connection of two D/L leg poles off the rear of the Table
- Each receiver on the Support can tilt independently of the other
- Support is easily connected to the center port of the main table bed
- Support is mild steel, hot dip galvanized, and painted
- Complete Stainless-Steel construction can be requested
