

Small Ruminant Table

The Shank's® Small Ruminant Table is designed for surgery on goats, sheep and other small ruminants weighing up to 1,000 lbs.

Technical Specifications

- 24" x 84" lateral surface (61cm x 213cm)
- Affixed padding (approximately 2"/5cm thick) – gray in color
- 6" swivel casters (2 rigid, 2 swivel with brakes)
- Self-contained power unit with hand control push button solenoid pendant
- Halter ties at various locations
- Hot dip galvanized/painted structural frame
- Lowered height 16" (41cm)
- Raised height 44" (112cm)
- Rated for 1,000 lbs. (454 kg)

Optional Table Top Size

- Table top can also be 32" x 72" (81cm x 183cm)

Hydraulic System and Operation

The Table is user friendly and merely requires access to power for operation. The hydraulic system is controlled by a hand pendant control with simple UP and DOWN functions. The table can be stopped at any position during raising and lowering.

Electrical Details/Amps

The electrical system can be wired for US/North American NEMA electrical requirements, or for country specific requirements for tables exported out of North America. Details for different electrical configurations and the amp usage are listed below:

- 115V / 60 hz – 8.2 amps
- 230V / 50 hz – 4.1 amps
