SS Intestinal Tray with Free Standing Base or Free Standing Base (if purchased separately)

The Shank's® SS Intestinal Tray with Free Standing Base is combination "package" that combines both the **SS Intestinal Tray ("Tray")** and the separate **Free Standing Base ("Base")**. When purchased together they provide an independent item to be used during intestinal/colic surgery. If a Tray was purchased initially, then the Base can be added on later to convert the table mounted Tray into the combination package.
